FY 2019 RESULTS

MARCH 10, 2020

▶ DISCLAIMER

Certain statements contained in this document are forward-looking statements. These statements includes, without limitation, statements that are predictions of or indicate future events, trends, plans, expectations or objectives. Examples of forward-looking statements include statements relating to business strategy, objectives, delivery schedules or future performance. Words such as “anticipates”, “believes”, “estimates”, “seeks”, “intends”, “may” and similar expressions are used to identify these forward-looking statements.

Such statements are, by their nature, subject to known and unknown risks and uncertainties. These uncertainties may cause our actual future results to be materially different than those expressed in our forward-looking statements as these are dependent on risk factors such as the variation of the exchange rates, program delays, industrial risks relating to safety, the evolution of regulations and the general economic and financial conditions and other matters of national, regional and global scale, including those of a political, economic, competitive and regulatory nature. Please refer to the section “Risks management” of the latest Latécoère’s Annual Report, for a description of certain important factors, risks and uncertainties that may affect Latécoère’s business.

Latécoère makes no commitment to update or revise any of these forward-looking statements, whether to reflect new information, future events or circumstances or otherwise.

H2 & FY 2019
BUSINESS
HIGHLIGHTS

THE BENEFITS OF TRANSFORMATION 2020

- Extension of Toulouse-Montredon site in France
- Inauguration of Belagavi site in India
- Extension of Plovdiv site in Bulgaria
- Final transfer of production of A320 Cockpit Control Panel to Had Soualem site in Morocco
- New Head Office in Toulouse in France

INVESTMENTS OVER 3 YEARS

TRANSFORMATION 2020

Extension of Toulouse-Montredon site

- ISO 14001 certification obtained in Summer 2019
- 5 additional digitally controlled machines in 2019 for a higher production power
- 3,000 sqm extension to accommodate surface treatment and painting activities
- Close to 900 Part Numbers re-internalized since the launch of the plant
- Objective to reach the full production rate of 330,000 parts per year in 2021
- Ramp-up of the production of surface treatment in Q1 2020

€8M
Capex
Invested

95%
Internalization

TRANSFORMATION 2020

Inauguration of Belagavi site

- Official opening with customers on Sept. 10, 2019
- Initial site of 4,400 sqm with 70 employees (300 in 2022)
- Activities on site:
 - For **Dassault Aviation**, Latécoère is manufacturing the radio Navigation harness of the Falcon 2000 and will transfer in 2020 the main harness of the same aircraft
 - Start of the production in May 2019
 - For **THALES Avionics Inc.**, Latécoère is manufacturing IFE harnesses for various platforms such as B777 or B737, A320 and various airlines such as Emirates, British Airways, Qatar, etc.
 - Start of the production in June 2019

TRANSFORMATION 2020

Extension of Plovdiv site

- Extension of 2,600 m² for a total production area of 6,600 m²
- Transfer of A320 doors structure sub-assembly
- Production of the A350 nose fuselage
- Rack structure production transfer finalized
- Total investment budget of around €15 million

TRANSFORMATION 2020

Final transfer of production of A320 Cockpit Control Panel to Had Soualem

- Transfer finalised from Colomiers/Labège production site
- Step by step transfer (first manufacturing then test)
- Smooth Ramp Up: Started with a rate of 50% in March 2018 to reach 90% in April 2019
- Approximately 29,000 to be delivered in 2020

TRANSFORMATION 2020

New Head Office in Toulouse

- Final step of Transformation 2020
- The office will bring together the teams of two divisions and the corporate teams
- Promotion of better synergies between teams
- Eco-friendly building

A GOOD BUSINESS MOMENTUM

- New EWIS contract for the Boeing 777X
- Boeing 787 passenger doors contract extension
- Acquisition of Bombardier's EWIS business

A GOOD BUSINESS MOMENTUM

New EWIS contract for the Boeing 777X

- Latécoère Interconnection Systems division's first collaboration on EWIS with Boeing
- Long term contract with Boeing to supply Electrical Wiring Interconnection Systems (EWIS) harnesses
- First electrical harnesses to be delivered in 2020.
- This build-to-print production will use automatic connection machines (LATMAT) starting 2021

A GOOD BUSINESS MOMENTUM

Boeing 787 passenger doors contract extension

- Latécoère will deliver 787 passenger doors until 2029
- According to forecast, this will represent 5,600 doors

A GOOD BUSINESS MOMENTUM

Cash Acquisition of Bombardier's EWIS business in Querétaro

- \$50 million acquisition of EWIS activities and related assets as well as a skilled workforce specializing in harnessing and electrical sub-assemblies in Querétaro
- Strengthening the relationship with Bombardier and other related customers

The transaction is subject to customary conditions and approvals and is expected to close in the first half of 2020.

BUSINESS OVERVIEW – OPERATIONS AND CUSTOMERS

The opportunity to acquire a large part of Bombardier's platforms EWIS content

Business overview

A state-of-the-art standalone facility

- Over 100,000 square feet
- Strategically located in Querétaro, Mexico
- ~1.9M direct labor hours production capacity
- Part of broader Bombardier manufacturing cluster and Aerospace excellence center

Wide Range of Products

- Mid-fuse harnesses
- Cockpit harnesses
- Box assembly
- Landing gear harnesses
- Interconnectors
- Other harnesses

(1) Sale of CRJ program to Mitsubishi Heavy Industries announced on June 25th 2019 and expected to close 1H 2020; (2) Through Bombardier Aviation's site in Belfast, Northern Ireland

A GOOD BUSINESS MOMENTUM

A global increase in production rates

- **Aerostructures**'s profitability was driven by higher volumes, notably on the Boeing B787.
- **Interconnection Systems** confirmed the very good momentum in cabin and kitting activities. The increase in production rates for Airbus A350, A320 and Dassault programs was partly offset by reduced rates on Airbus A330, A400M and ATR programs.

Delivery rates by aircraft	2018	2019	
A320 - Doors *	391	347	↘
A320 - Interconnection Systems	644	684	↗
A350 - EWIS & Racks	92	109	↗

GO-TO-MARKET INNOVATION

- Supporting Aerostructures and Interconnection Systems to win new business
- An effort of 2% of sales in innovation to support growth
- Pursuing differentiation and strengthening our goodwill
- LiFi technology by Latécoère takes off

R&T CHALLENGES AND TARGETS

Supporting Aerostructures and Interconnection Systems to win new business

Significant new business opportunities drive our R&T roadmaps in time-to-market

- Lead the competition for the new aircraft through cooperation with the airframers
- Increase marketshare on the existing fleet with innovative and competitive solutions

Aerostructures

1. Build differentiation on structural components and equipment through a system approach.
2. Increase value on metallic and composite manufacturing & assembly technologies for core and new products: doors, complex fuselage assemblies, composite structures.

Interconnection Systems

1. Shift to optics : develop optical network for data & LiFi transmission in cabin.
2. Build differentiation on cabin power infrastructure with converters and controllers.
3. Increase value on rack and cockpit equipment with new standard for Racks and cockpit panels.
4. Develop high density wiring in harsh environment

Through a focused R&T strategy on demonstrators and differentiating technologies

R&T FINANCIALS

An effort of 2% of sales in innovation to support growth

AEROSTRUCTURES – Win the new aircraft

➔ Reinforce the R&T effort : from 5M€ to 9M€ over 2017-2025

INTERCONNECTION – Disrupt cabin and develop capabilities

➔ Foster the R&T activity : 5M€ to 6M€ over the 2017-2025 period

Leading to a shift in patent registrations

➔ A portfolio of 142 patents

Patent Family 1st Registration

BRINGING GO-TO-MARKET INNOVATION

LiFi technology by Latécoère takes off

At the International Paris Air Show, Air France, Latécoère and Ubisoft promoted their new LiFi (Light Fidelity) technology using light to transmit data and run an in-flight video game tournament.

On October 30th, 2019, Air France tested the very first flight equipped with LiFi technology developed by Latécoère on board the commercial flight AF6114 operated by Airbus A321 from Paris-Orly to Toulouse.

LATECOÈRE

Huneed Technologies

In October 2019, Latécoère announced the industrial scale-up of its LiFi technology, thanks to a first MoU signed with Signify and a second MoU signed with Huneed Technologies.

LATECOÈRE

READY FOR THE AVIATION GREEN DEAL

- How Latécoère is contributing to an environmentally responsible aviation

READY FOR THE AVIATION GREEN DEAL

How Latécoère is contributing to an environmentally responsible aviation

Impact of Latécoère's activities under control

- 8/16 sites certified ISO-14001 (4 Interconnection Systems and 4 Aerostructures)
- Certification planned in 2020 (Hermosillo, Chargaia & Fouchana, Vendargues), 2021 (Plovdiv, Hambourg) and 2022 (Belagavi, Prague)

Corporate culture

- International launch in 2019 of the "Green Week" based on initiatives taken by the production sites.

Calculation of the group's carbon footprint planned in 2020 by Bureau Veritas

Focusing on the elements within our perimeter and on which we have a power of influence:

- Direct emissions
- Indirect emissions related to electricity and steam/hot/cold consumption
- Upstream/downstream freight transport, business travel

A photograph of three technicians in a laboratory setting, working on a large, white, rectangular electronic device. The technicians are wearing dark blue polo shirts and safety glasses. The background is a blue, diamond-patterned acoustic panel. The technician on the left is using a red tool. The technician in the center is leaning over the device. The technician on the right is wearing yellow gloves. The device has various components, including green and yellow parts. The overall scene is brightly lit.

HEDGING PORTFOLIO

Portfolio as of March 9, 2020 = \$1,051M

- New hedges put in place in 2020 for \$300m
- FY 2020 and FY 2021 fully secured
- FY 2022 secured for > 75%

	2019	2020e	2021e	2022e
New guidance	1.17	1.19-1.21	1.19-1.21	1.18-1.21
<i>Old guidance</i>	<i>1.18</i>	<i>1.24</i>	<i>1.23-1.25</i>	<i>n/a</i>

A large, orange industrial robotic arm is the central focus, positioned in a factory environment. The arm's structure is complex, with a white lattice-like internal frame visible through the orange outer casing. The background shows various industrial components, including blue machinery, a metal safety fence, and overhead cables. The lighting is bright, typical of an industrial facility. The overall scene conveys a sense of advanced manufacturing technology.

PART 3

OUTLOOK

2020 OUTLOOK

Key assumptions

FY2020 guidance

- Increased rates for the Embraer E2 and Airbus A320 family
- Positive contribution from Interconnection Systems' new business
- Soft demand on twin aisle programs both at Airbus and Boeing
- Price reduction on Airbus programs in both divisions
- Lower production rates for the Embraer E1 and Dassault Aviation's F7X/F8X programs
- Excluding impact of the acquisition of Bombardier EWIS activity and Coronavirus crisis
- Group revenue to decline by circa 5% at constant exchange rates
- Low-single digit Group recurring operating margin
- Positive operating free cash flow

THANK
YOU

A technician in a dark t-shirt is seen from the side, focused on organizing a complex network of cables within a server rack. The cables are bundled and secured with white zip ties, creating a structured and professional appearance. The background is filled with more racks of similar cable management, suggesting a large-scale data center environment. The overall lighting is dim, with a blueish tint, emphasizing the technical nature of the work.
